

# ReadMe for WedgeLink Hardware Wedges

© 2005 MicroRidge Systems, Inc. All rights reserved.

This document includes updated information for the documentation provided with the WedgeLink HW and WedgeLink SM hardware wedges.

- **WedgeLink HW.** The hardware wedge for transferring data from serial devices to any PC application that accepts keyboard inputs.
- **WedgeLink SM.** The hardware wedge for transferring measurement data from Mitutoyo gages to any PC application that accepts keyboard inputs.

## Contents

- Part 1 Technical Support & Company Information
- Part 2 System Requirements
- Part 3 Known Problems & Workarounds
- Part 4 WedgeLink HW Setup Program History
- Part 5 WedgeLink HW Firmware History
- Part 6 WedgeLink SM Setup Program History
- Part 7 WedgeLink SM Firmware History

## **Part 1     *Technical Support & Company Information***

MicroRidge Systems, Inc.  
PO Box 3249  
56888 Enterprise Dr  
Sunriver, OR 97707-0249

**Technical Support:**  
**(541) 593-1656**  
**8:00 a.m. to 4:30 p.m. Pacific time**

E-mail: [support@microridge.com](mailto:support@microridge.com)

(541) 593-1656 FAX 593-5652  
8:00 a.m. to 4:30 p.m. Pacific time

## **Part 2     *System Requirements***

The system requirements for the WedgeLink hardware wedges are as follows:

- 500K of free disk space.
- Serial ports for transferring setup parameters to the hardware wedge.
- USB port if you are using a USB to PS/2 adapter to send the keyboard data to the PC.

## **Part 3     *Known Problems & Workarounds***

There are no known problems with any of the WedgeLink hardware wedges.

## ***Part 4 WedgeLink HW Setup Program History***

The WedgeLink HW hardware wedge is used to transfer data from a serial device to any PC application that accepts keyboard inputs. This program (WedgeLink\_HW\_Setup.exe) is for use on a PC to define and transfer the setup parameters to and from the WedgeLink HW hardware wedge.

### **Ver 1.1.0.12 (6-6-05)**

Original release of WedgeLink HW setup program.

## ***Part 5 WedgeLink HW Firmware History***

The WedgeLink HW hardware wedge is used to transfer data from a serial device to any PC application that accepts keyboard inputs. The firmware is the software that resides within the WedgeLink HW hardware wedge. This firmware is loaded into the WedgeLink HW hardware wedge with the WedgeLink HW firmware update program (WedgeLink\_HW\_Update.exe).

### **Ver 1.11 (6-13-05)**

Original release of WedgeLink HW hardware wedge.

## ***Part 6 WedgeLink SM Setup Program History***

The WedgeLink SM hardware wedge is used to transfer measurement data from Mitutoyo gages to any PC application that accepts keyboard inputs. This program (WedgeLink\_SM\_Setup.exe) is for use on a PC to define and transfer the setup parameters to and from the WedgeLink SM hardware wedge.

### **Ver 1.1.0.12 (6-6-05)**

Original release of WedgeLink SM setup program.

## ***Part 7 WedgeLink SM Firmware History***

The WedgeLink SM hardware wedge is used to transfer measurement data from Mitutoyo gages to any PC application that accepts keyboard inputs. The firmware is the software that resides within the WedgeLink SM hardware wedge. This firmware is loaded into the WedgeLink SM hardware wedge with the WedgeLink SM firmware update program (WedgeLink\_SM\_Update.exe).

### **Ver 1.11 (6-13-05)**

Original release of WedgeLink SM hardware wedge.
