

CONFLICT MATERIALS POLICY

MicroRidge Systems, Inc. does not manufacture the electronic components contained in our products. We cannot provide detailed information relating to the use of conflict minerals in the production of the electronic components we use.

We purchase our components from major distributors of electronic components in the United States who acquire components directly from the manufacturer. The Original Component Manufacturer (OCM) is currently the only source of detailed information regarding the substances, including conflict minerals used in the manufacturing of their products.

Our suppliers have indicated to us that they continue to survey manufacturers to confirm no “conflict minerals” from the Democratic Republic of the Congo or any adjoining countries (“DRC Countries”) are used in the manufacture of products supplied to them as defined in Section 1502 of the Dodd-Frank Wall Street Reform and Consumer Protection Act.

The components supplied to us are designed and manufactured with source material from environmentally and socially responsible suppliers and comply with the Electronics Industry Code of Conduct to the best of our knowledge.

Please call us at 541.593.1656 if you have any questions regarding this matter.

Riley Tronson
President & Director of Product Development
