

MobileCollect Wireless Now Supports Mitutoyo U-Wave Transmitters

U-Wave Fit Transmitters

Models: U-WAVE-TM / U-WAVE-TC

U-Wave-T Transmitter

AT A GLANCE: What this means to U-Wave Users

- Allows U-Wave and MobileCollect wireless transmitters to transmit gage measurements to the same MobileCollect Base receiver.
- U-Wave customers can add gages from Mahr, Starrett, RS-232 output devices, and others to their wireless systems.
- Compatible with all data collection programs, including MeasurLink.
- No modifications to U-Wave transmitters.
- No additional operator training required.
- Protects end-user investment in U-Wave transmitters, connectors, and cables.

MobileCollect Wireless Now Supports Mitutoyo U-Wave Transmitters

DETAILS: Supporting U-Wave Transmitters

- Each U-Wave-R receiver must be replaced with a MobileCollect Base receiver containing the RM2.4 Radio Module (all current models).
- Installed MobileCollect Base receivers containing the RM2.4 Radio Module can be field upgraded by user to add U-Wave compatibility.
- Compatible with U-Wave-T, U-Wave-TM, and U-Wave-TC transmitter models.
- U-Wave output format option added to Xpress Setup and Extended Setup programs.
- Pair U-Wave transmitter to MobileCollect receiver using Xpress Setup, Extended Setup, or “on-the-fly” method (no setup program required).
- Use Wedge/USB Base receiver to send data into Excel, Access, Minitab, and other programs without keyboard wedge software on your PC.
